

Topic: Information Security

Group Activity

Sample Scenarios:

Scenario ID	Scenario Description
S1	A student's exam results were modified in the database without the professor's knowledge.
S2	A virus infected a company network after an employee clicked a suspicious email attachment.
S3	An e-commerce website crashed on Black Friday, preventing customer transactions.
S4	An employee used '123456' as their system password and was hacked.
S5	A hospital couldn't access patient records due to a ransomware attack.

Instruction:

For each scenario, the group must:

- Identify which part of the CIA Triad is affected.
- Propose at least 2 tools or practices to mitigate the problem.
- Justify your choices in 3–5 sentences.
